

# FIXED AND GROWTH MINDSET

## COURSE DESCRIPTION

Student motivation and engagement are critical to student learning and success. The research on developing a growth mindset has provided new insights into how praise and feedback can promote or hinder learning; how students can gain internal motivation, and how teachers can directly impact how students view their academic success. Teachers will learn the latest research, gain hands on tools and practical ideas, and create plans and strategies on how to implement this into their teaching style and classroom.

## COURSE HIGHLIGHTS

### FOUNDATIONAL CONCEPTS

Mindset is a key driver of our performance

Our mindset is shaped by our thinking

Research on our human brain performance have given us key insights into the drivers that impact our outcomes

### KEY TOPICS

How does mindset drive our performance?

Effort vs talent

Focusing on outcomes vs process

### FIXED AND GROWTH TOOLS

How our language impacts mindset

What you focus on, gets reinforced

How you give and receive feedback

How you structure formal assessment

How you structure your classroom

How you can look at your own growth mindset as a teacher

**OUTCOMES** Improved ownership for learning and outcomes by students

Ability to implement fixed and growth mindset tools in the classroom

Teachers gain more insight into how they can create engaged learners

Students become more focused on growth and learning rather than outcomes, which has long term impacts on their performance

**COMING IN 2018**
